CLAIMS

1. An isolated nucleic acid comprising a nucleotide sequence encoding an *A. fumigatus* polypeptide selected from the group consisting of SEQ ID NO: 22157 - SEQ ID NO: 44266.

2. A recombinant expression vector comprising the nucleic acid of claim 1 operably linked to a transcription regulatory element.

3. A cell comprising a recombinant expression vector of claim 2.

4. A method for producing an *A. fumigatus* polypeptide comprising culturing a cell of claim 3 under conditions that permit expression of the polypeptide.

5. An isolated nucleic acid comprising a nucleotide sequence encoding an *A. fumigatus* polypeptide or a fragment thereof, said nucleic acid selected from the group consisting of SEQ ID NO: 1 - SEQ ID NO: 22156.

6. A recombinant expression vector comprising the nucleic acid of claim 5 operably linked to a transcription regulatory element.

7. A cell comprising a recombinant expression vector of claim 6.

8. A method for producing an *A. fumigatus* polypeptide comprising culturing a cell of claim 7 under conditions that permit expression of the polypeptide.

9. A probe comprising a nucleotide sequence consisting of at least eight contiguous nucleotides of a nucleotide sequence selected from the group consisting of SEQ ID NO: 1 - SEQ ID NO: 22156.

10. An isolated nucleic acid comprising a nucleotide sequence of at least eight nucleotides in length, wherein the sequence is hybridizable to a nucleic acid having a nucleotide sequence selected from the group consisting of SEQ ID NO: 1 - SEQ ID NO: 22156.

11. A vaccine composition for prevention or treatment of an *A. fumigatus* infection comprising an effective amount of a nucleic acid of claim 5 and a pharmaceutically acceptable carrier.

12. A vaccine composition of claim 11, further comprising an adjuvant.

13. A vaccine composition of claim 11, further comprising one or more additional active ingredients.

14. A method of treating a subject for *A. fumigatus* infection comprising administering to a subject a vaccine composition of claim 11, such that treatment of *A. fumigatus* infection occurs.

15. A method of claim 14, wherein the treatment is a prophylactic treatment.

16. A method of claim 14, wherein the treatment is a therapeutic treatment.

17. A recombinant or substantially pure preparation of an *A. fumigatus* polypeptide or a fragment thereof, wherein said polypeptide is selected from the group consisting of SEQ ID NO: 22157 - SEQ ID NO: 44266.

18. A vaccine composition for prevention or treatment of an *A. fumigatus* infection comprising an effective amount of an *A. fumigatus* polypeptide of claim 17 and a pharmaceutically acceptable carrier.

19. A vaccine composition of claim 18, further comprising an adjuvant.

20. A vaccine composition of claim 18, further comprising one or more additional active ingredients.

21. A method of treating a subject for *A. fumigatus* infection comprising administering to a subject a vaccine composition of claim 18, such that treatment of *A. fumigatus* infection occurs.

22. A method of claim 21, wherein the treatment is a prophylactic treatment.

23. A method of claim 21, wherein the treatment is a therapeutic treatment.

24. A method for detecting the presence of a *Aspergillus* nucleic acid in a sample comprising:

(a) contacting a sample with a nucleic acid of claim 5 under conditions in which a hybrid can form between the probe and a *Aspergillus* nucleic acid in the sample; and

(b) detecting the hybrid formed in step (a), wherein detection of a hybrid indicates the presence of a *Aspergillus* nucleic acid in the sample.

25. A computer readable medium having recorded thereon the nucleotide sequences depicted in SEQ ID NO: 1 - SEQ ID NO: 22156 or fragments thereof.

26. A computer based system for identifying fragments of the *Aspergillus* genome of commercial importance comprising the following elements;

a) a data storage means comprising the nucleotide sequences SEQ ID NO: 1 - SEQ ID NO: 22156 or fragments thereof,

b) a search means for comparing a target sequence to the nucleotide sequences of the data storage means of step (a) to identify homologous sequences, and;

c) a retrieval means for obtaining said homologous sequences(s) of step (b).

27. A method of identifying commercially important nucleic acid fragments of the *Aspergillus* genome comprising the step of comparing a database comprising the nucleotide sequences SEQ ID NO: 1 - SEQ ID NO: 22156 or fragments thereof with a target sequence to obtain a nucleic acid molecule comprised of a complementary nucleotide sequence to said target sequence, wherein said target sequence is not randomly selected.

28. A method for identifying an expression modulating fragment of the *Aspergillus* genome comprising the step of comparing a database comprising the nucleotide sequences SEQ ID NO: 1 - SEQ ID NO: 22156 or fragments thereof with a target sequence to obtain a nucleic acid molecule comprised of a complementary nucleotide sequence to said target sequence, wherein said target sequence comprises sequences known to regulate gene expression.

ABSTRACT OF THE DISCLOSURE

The invention provides isolated polypeptide and nucleic acid sequences derived from *Aspergillus fumigatus* that are useful in diagnosis and therapy of pathological conditions; antibodies against the polypeptides; and methods for the production of the polypeptides. The invention also provides methods for the detection, prevention and treatment of pathological conditions resulting from fungal infection.

Attorney Docket No. PATH99-10

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Declaration for Patent Application/Power of Attorney

As a named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated next to my name;

I believe I am the original, first and sole inventor (if only one name is listed) or an original, first and joint inventor (if plural names are listed in the signatory page(s) commencing at page 3 hereof) of the subject matter which is claimed and for which a patent is sought on the invention entitled

NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO *ASPERGILLUS FUMIGATUS* FOR DIAGNOSTICS AND THERAPEUTICS

the specification of which (check one)

[X] is attached hereto.

[] was filed on _____ as United States Application

Number _____

and was amended on _____ (if applicable).

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is known by me to be material to patentability as defined in 37 C.F.R. §1.56.

I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or 365(b) of any foreign application(s) for patent or inventor's certificate or 365(a) of any PCT international application which designated at least one country other than the United States of America, listed below and have also identified below, by checking the box, any foreign application for patent or inventor's certificate, or of any PCT international application having a filing date before that of the application on which priority is claimed:

Prior Foreign Application(s)		Priority	Certified Copy Filed?		
			Not Claimed	YES	NO
_____ (Number)	_____ (Country)	_____ (Day/Month/Year filed)	[]	[]	[]
_____ (Number)	_____ (Country)	_____ (Day/Month/Year filed)	[]	[]	[]
_____ (Number)	_____ (Country)	_____ (Day/Month/Year filed)	[]	[]	[]

I hereby claim the benefit under 35 U.S.C. §119(e) of any United States provisional application(s) listed below.

60/113,476 (Application Number)	December 21,1998 (Filing Date)
60/104,683 (Application Number)	October 16, 1998 (Filing Date)
_____ (Application Number)	_____ (Filing Date)

I hereby claim the benefit under 35 U.S.C. 120 of any United States application(s), or 365(c) of any PCT international application designating the United States of America, listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States or PCT International application in the manner provided by the first paragraph of 35 U.S.C. 112, I acknowledge the duty to disclose information known by me to be material to patentability as defined in 37 C.F.R. 1.56 which became available between the filing date of the prior application and the national or PCT international filing date of this application:

(Application Serial No.)	(Filing date)	(Status: patented, pending, abandoned)
(Application Serial No.)	(Filing date)	(Status: patented, pending, abandoned)

As a named inventor, I hereby appoint the following attorneys and/or agents:

Nina L. Pearlmutter Reg. No. 35,639

the mailing address and telephone number of whom is GENOME THERAPEUTICS CORPORATION, 100 Beaver Street, Waltham, MA 02453 and (781) 398-2508, with full power of substitution and revocation to prosecute this application and to transact all business in the Patent and Trademark Office connected therewith.

Please send correspondence to: [] Customer No. Noted Above
or
[X] Address below:

Nina L. Pearlmutter, Ph.D., Esq.
Genome Therapeutics Corporation
Waltham, Massachusetts 02453

Direct telephone calls to: Nina L. Pearlmutter Telephone No.: 781-398-2508

Direct facsimiles to: Nina L. Pearlmutter Facsimile No.: 781-398-2607

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
